I, myself, ask of the judge(s) to securely control so help you God acts that violate federal law of application to go to work everyday and safeguard retaliation or punishment using property of values as of the morning of 6:00 AM August 22, 2022 and until further evidence credible are gathered from secure resources to gain stability, reliability, durability, and sustainability base on non-profit and profitability dealing with simple and complex business to business emergency management of products for operation process. It occurred at 11:30 AM Friday August 19, 2022. I was told if I don't work on 2nd shift then to not come in. Human resources has a resigned sheet or separation paper.

Based on inapplicable terms and conditions without proper record for work environment for monitoring and regulations duties including inadequate titles, machine inspections, operators, violation of behaviors, and safety procedures for stability security of process.

Tactical alternative threats, techniques, procedures, behavioral policies, etc.
